

# Tomas Pereira

## Junior Frontend Developer

City: Autonomous City of Buenos Aires, Argentina

Neighborhood: Nuñez

Age: 24 years old

Cell phone: +54 9 11 28815089 (I don't have WhatsApp, I only accept calls)

Email: [tomaspereira2k@gmail.com](mailto:tomaspereira2k@gmail.com)

Portfolio: <https://www.tomaspereira.com.ar>

LinkedIn: <https://www.linkedin.com/in/tomas-pereira-dev>

Github: <https://www.github.com/TomasPereira-Dev>

### About me:

I have experience working in interdisciplinary teams developing MVPs, where organization, communication and empathy play a vital role for the team's success.

I usually take the initiative in making decisions if I consider it necessary and I like to teach others what I know about code and design, generally giving feedback on platforms such as [Frontend Mentor](#) or discord communities.

I am looking for my first formal job, where I can develop new skills and responsibilities in the long term.

### Experience with teams:

- **[No Country](#):**  
development of MVPs in teams of approximately 15 people with deadlines of 4 weeks, where agile methodologies are applied (**Scrum**) in conjunction with work management tools (**trello**) to maintain optimal communication and achieve established weekly objectives, avoiding potential conflicts and technical debt in an orderly, effective and polite manner.  
**Period:** February 2024 - May 2024.

### Personal projects:

- **Audiophile (original design by Frontend Mentor):**  
An E-commerce oriented to audio products, fully operational, made mainly with **React**, **JavaScript** and **Tailwind** and Mercado Pago's Checkout Pro API for processing payments. Basic backend made with Node.js and Express [Click here to see the deployment](#).
- **Where In The World (original design by Frontend Mentor) :**  
A page that makes use of Restcountries, Wikipedia and Unsplash APIs to show data and photos from the countries of the world, made with **Tailwind**, **Javascript**, **React**. Uses the **QuickSort algorithm** to sort all the countries by population amount and alphabetically at the landing page [Click here to see the deployment](#).

### Skills and Knowledge:

- ◆ **Stack:** HTML, CSS, Javascript, React, Tailwind.
- ◆ **Soft-Skills:** Flexibility, adaptability, Organization and Time Management.
- ◆ **Other technologies:** Git, GitHub, Slack, Trello, Figma.
- ◆ **Languages:** Intermediate level English, communicational.
